

Basic Instructions for gaming consoles and Smart TVs:

****TV will need to have an internet browser to connect****

- 1.) Go to "Network Settings".
- 2.) Choose the 'WiFi' option they have available.
- 3.) Connect to your WiFi network, when it is listed.
 - For PS4s, you can try "Custom" settings, but we recommend not changing any of the settings when prompted. (Just click through the settings)
- 4.) Check your network status. It may say you don't have internet connection, but it should be connected to your WiFi network.
- 5.) Open a browser page and try navigating to a web page (ex: coyotevalley101.com)
- 6.) You should then be prompted to add your voucher and accept the terms and agreements.

Now you should be successfully connected to your Wi-Fi.
